The secret to a green garden...

greywater gardener 230™

waterwise systems®

Waterwise Systems® patented Greywater Gardener230™ is a permanent gravity irrigation system that reuses the water from your washing machine, shower and bath to maintain a healthy garden without tap water. The system is suitable for both new and established gardens.

The Greywater Gardener230™ is a unique, safe greywater recycling system that waters every plant in your garden each time a load of washing is done. In larger gardens the system can also be used with shower and bath water.

Benefits:

- Saves time
- Saves water
- Saves money
- Saves your garden
- Greener, healthier plants
- Greener, thriving gardens
- Water-efficient greywater irrigation system
- Deeper watering to the root zone of plants
- Gardens flourish due to regular greywatering
- Immediate irrigation to your plants upon water re-use
- Your water bills will be reduced
- Maintains your homes value
- The simplest way to water your whole garden

A fully installed standard system includes:

- In-garden consultation
- A system designed for your garden
- Complete patented greywater and irrigation system
- Full installation by experienced greywater and plumbing professionals
- All the support and information you need to use your system

World's best greywater garden solution

1 The Washing Machine or Shower

Once the Greywater Gardener230™ irrigation system has been installed, simply use your washing machine as usual, or jump in the shower, and every plant in your garden is watered.

2 The Greywater Diverter Switch

If using a garden unfriendly cleaning product simply click the switch beside your washing machine to send the water down the drain.

3 The Surge Capsule

As soon as your greywater enters the capsule it automatically sends the water to your garden.

4 The Drip Irrigation System

The System includes a patented irrigation system. This highly-efficient gravity irrigation system feeds water directly to the root zone of each of your plants.
