THE COLLECTION
SPRING 2013

BAGNODESIGN

LONDON

The BAGNODESIGN Spring Collection consists of a comprehensive selection of high quality bathroom and plumbing solutions encompassing a wide range of value expectations.

Our products are made throughout the world to the highest European norm's whilst also meeting the latest design trends.

The Collection can be viewed in showrooms throughout the world or through our website www.bagnodesign.co.uk

Much of the range is handcrafted by artisans offering unique detail and original finishes. Our furniture is all made in Tuscany, Italy whilst our marble basins use beautiful natural stone from Italy, Turkey and Bali.

We also use the latest technology in our products such as our mirrors with integrated televisions or our unique spa systems that are all produced and tested in our own manufacturing units in the UK and Dubai.

All products are supplied with warranty's in accordance with the relevant international standards.

BAGNODESIGN bathrooms are installed in some of the world's most exclusive hotels and we are recognised suppliers to many global hospitality chains.

Our brochure details a comprehensive design led range of bathroom products all under a single brand with coordinated ranges that can improve your lifestyle and that meet the highest international standards.

One brand, One solution

basins

FINISHES:

The various marbles used have been chosen for their strong concentration of fossils and as they are a purely natural product, there will always be the presence of different variations of veins, colours and shades, as well as micro-cracks and small holes. This gives each piece the characteristic of being truly unique.

Note: The basins in this series do not have overflow or tap holes - unless otherwise specified

Mechanism Converter Kit
Converts AQS-T001-SI Side Inlet Mechanism
to be Used in a Back Inlet Cistern that has a
Cut Out
Includes Thread Converter, Clip and Flexible
Hose
Connects to 3/8" Male Connection

Nowadays a number of technologies enable us to reduce water consumption considerably. These are inexpensive devices which can even halve the consumption of running water. We are just talking about aerators and connection fittings with flow-limiting devices.

IT IS WORTHWHILE INSTALLING WATER-SAVING SYSTEMS.

Large-scale research, e.g. the "Bagnacavallo Project" undertaken by the Italian environmental association Legambiente, **has shown that a 40-50% cut in the consumption of water from taps and showerheads, made possible by the installation of flow-limiting devices (*), can decrease the total water usage per household by as much as 20%** (washing machines, dishwashers, most kitchen activities, cleaning, and so on, account for more than half of it). **This means that the savings in your utility bills will pay for the cost of these devices within a few months.**

By installing these water-saving systems you can make a real contribution to energy conservation and avoid the waste of valuable resources. The less water you employ, the less water has to be pumped to your homes, thus saving energy. And when it comes to hot water, you also save the energy required to heat it.

These savings alone would justify installing them in your homes.

- You can **REDUCE WATER USE** by up to **50%***.
- You can **SAVE ENERGY.**
- You can **CUT water and energy COSTS.**

INSTALLING THEM IS CHILD'S PLAY.

They can be installed with the greatest ease. Simply screw the low-flow aerator onto the end of your tap. If your showerhead or tap do not allow the use of such aerators, screw the connection fitting with flow restrictor onto the flexible hose or the showerhead.
