BAGNODESIGN

This Product Guide represents a collection of high quality designer bathroom solutions for residential, hospitality, commercial and institutional installation.

Our own BAGNODESIGN range of products are manufactured globally to European standards, incorporating the latest design trends and utilising the most innovative technology and craftsmanship.

Our extensive range covers all product categories relating to the bathroom and to complement each other we have created product families with matching sanitaryware, mixers, accessories and baths. The range encompasses value and quality across all levels enabling us to supply hotel and residential contracts as well as having a contemporary retail offer.

To complement our product portfolio we offer a collection of luxury international brands with unique product offerings.

The brands of KALDEWEI, GEBERIT, DYSON, VADO, APAISER and VOLA are well known to the global design community, manufacturing product to the highest standards in terms of quality, design, practicality and innovation.

In addition, the brands of GSI, FANTINI, EFFIGIBI, BOSSINI, GALASSIA and BERTOCCHI offer wonderful Italian design to add value and style to your bathroom or wellness area.

The complete BAGNODESIGN range can be viewed at our flagship showroom in Dubai as well as our A&D Centre in Clerkenwell, London and in most major cities across the Middle East.

BAGNODESIGN

During the past 15 years we have supplied many projects throughout the Middle East, Africa, Central Asia and the Indian Ocean in all sectors. A few examples are shown herewith, a full reference list is available upon request.

Our project supply division benefits from the logistic and technical support infrastructure of the SANIPEX group of which BAGNODESIGN is a subsidiary company.

FINISHES:

 Honed Classic Travertine	 Honed Walnut Travertine	 Honed Taurus Black	 Honed Nordic Grey	 Beige Cream	 Bati Black Basalt
---	---	--	---	---	---

The various marbles used have been chosen for their strong concentration of fossils and as they are a purely natural product, there will always be the presence of different variations of veins, colours and shades, as well as micro-cracks and small holes. This gives each piece the characteristic of being truly unique.

Note: The basins in this series do not have overflow or tap holes - unless otherwise specified

DIAMOND

basins

| Diamond

Article No.	Description	Finish
 KAR-K9520-MW	Diamond Freestanding Wash Basin in Solid Surface without Overflow Dia. 400 x 914 mm	White

SOLID SURFACE is a compound, made up of high percentage of mineral extenders from nature (ATH derived from bauxite) as well as a small one of high-pureness polyester and acrylic polymers; therefore, it is an inert, hypoallergenic and non-toxic material. It is 100% recyclable, practically fireproof (class I), strongly UV-resistant, solid and non-porous, hygienic and healthy, resistant and agreeable to the touch for its velvety and natural stone-like finish. SOLID SURFACE is 100% restorable, i.e. it can bring back the original state and look by simply using an abrasive sponge and a detergent, thus removing even cigarette burns. These properties of durability and restorability make it an eco-compatible material.

Beneficial effects of 7 colours on the body and mind: Colours have always been a part of our world. They are a vital force and source of energy.

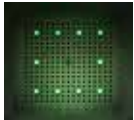

Cromotherapy stimulates the body and the mind, helping to restore their natural balance.

The control keyboard for cromotherapy is water proof, so the box may be positioned either inside or outside your shower box.

Dream-Light Shower Heads with RGB LED lights, including low voltage transformer, control keyboard for Cromotherapy and flexible water connection.

WELLNESS

Logica Hammam delivers all the magic of a Turkish bath inside your own shower space, a unique product with dual functions, with the focus on practicality. The Hammam includes a roomy bench seat that recalls the Turkish bath tradition. The laminated grès porcelain chosen as a covering for the shower area creates a harmonious impression of natural material used to create an innovative design. The steam is generated by the Aquasteam unit that conceals state-of-the-art technology that is practical and intuitive to use. The RGB LED lighting with colour therapy and the built-in audio speakers make the Logica Hammam a very special space in which to unwind and recharge your batteries.

With the Smart Box Effegibi has broadened the range adding shower trays and ceilings to the design options for Turkish baths. The unfinished walls give the end user the option to personalise and make the Smart Box unique by adding tiles from any range and shower fittings and mixers to complement the surrounding environment. The Smart Box can be installed in the shower space of any bathroom.

washroom accessories

Fastest dry time

The Dyson Airblade™ hand dryer dries hands in just 10 seconds.

Lowest environmental impact

It generates 72% less carbon emissions than paper towels.¹

Most hygienic

HEPA filter captures 99.9% of bacteria from the air drying hands.

The fastest, most hygienic hand dryer.
Now available at BAGNODESIGN.

dyson airblade

The fastest, most hygienic hand dryer.

Nowadays a number of technologies enable us to reduce water consumption considerably. These are inexpensive devices which can even halve the consumption of running water. We are just talking about aerators and connection fittings with flow-limiting devices.

IT IS WORTHWHILE INSTALLING WATER-SAVING SYSTEMS.

Large-scale research, e.g. the "Bagnacavallo Project" undertaken by the Italian environmental association Legambiente, **has shown that a 40-50% cut in the consumption of water from taps and showerheads, made possible by the installation of flow-limiting devices (*), can decrease the total water usage per household by as much as 20%** (washing machines, dishwashers, most kitchen activities, cleaning, and so on, account for more than half of it). **This means that the savings in your utility bills will pay for the cost of these devices within a few months.**

By installing these water-saving systems you can make a real contribution to energy conservation and avoid the waste of valuable resources. The less water you employ, the less water has to be pumped to your homes, thus saving energy. And when it comes to hot water, you also save the energy required to heat it.

These savings alone would justify installing them in your homes.

- You can **REDUCE WATER USE** by up to **50%***.
- You can **SAVE ENERGY.**
- You can **CUT water and energy COSTS.**

INSTALLING THEM IS CHILD'S PLAY.

They can be installed with the greatest ease. Simply screw the low-flow aerator onto the end of your tap. If your showerhead or tap do not allow the use of such aerators, screw the connection fitting with flow restrictor onto the flexible hose or the showerhead.
