Profile

Water is the most important natural resource available to mankind today, and is rapidly becoming limited, which makes saving water absolutely critical to the future of our environment. At Techno-Mix Sanitary FZCO, we are totally dedicated to preserving water and believe in following sustainable water policies. Across the world, saving water is becoming a major concern, not simply in the arid regions of the planet, but elsewhere too. Techno-Mix has been at the forefront of this key issue since 2003, having foreseen the problem with depleting water resources and has taken the lead in finding ways to cut water consumption.

Techno-Mix was established in the Jebel Ali Free Zone, Dubai in 2003 by the IKK Group of Companies. Since then, Techno-Mix Sanitary FZCO, backed by the strong IKK Group, has become a leading professional supplier of bathroom and kitchen products that help to save water, all delivered in high quality, and stylish designs.

The range of products, both manufactured and distributed by Techno-Mix Sanitary FZCO, offer full and perfect bathroom solutions, including single and double handle mixers, taps, faucets for bathrooms and kitchens; complete bathroom sanitary-ware sets; shower rooms, steam and sauna rooms; normal and massage bathtubs as well as various stylish accessories to complete the perfect bathroom.

Techno-Mix Sanitary FZCO is dedicated to continuous product development to bring products of the finest quality to its clients. The research programmes that are in place drive the products to not only meet but exceed international standards wherever possible. The testing processes are rigorous; on the raw material as well as on the final products, and carried out regularly, to ensure product quality of the highest standard. All testing is done in-house at the Group's quality control laboratories, all of which are fully equipped to implement test procedures in line with international standards.

Techno-Mix Vision

Our vision is not only to conserve and protect the vital natural resource of fresh water through the use of our products, but also to help encourage and increase public awareness about water conservation. Techno-Mix has adopted the Techno-Green Building drive to provide people with the fundamental knowledge of saving water techniques. In addition, as a member of the U.S. Green Building Council, Techno-Mix also meets the requirements of (LEED) the Leadership in Energy and Environmental Design, Green Building Rating System.

Techno-Mix has achieved its vision by working in collaboration with the world's best designers, architects, suppliers and intelligent components manufacturers, with 'TUV', 'NSF', 'WATERMARK', 'ACS', 'WRAS', 'CSTB', 'KIWA' Quality Assurance and Certificates. This, combined with the high-level of quality

Techno-Mix Mission

Techno-Mix has a mission to redefine the bathroom as a comfortable, well-designed living space while achieving 40-60 percent of water savings compared to conventional buildings of the same size.

This mission is already well underway, with our valued clientele list including customers such as contracting companies, chain of international hotels, reliable and authorized distributors. Our products have been installed in residential properties and other projects such as hotels, residential and office towers, residential buildings, villas, and apartments. The strategic and convenient location of the company in Dubai's Jebel Ali Free Zone enables Techno-Mix to dispatch products promptly to its main markets across the GCC, Middle East, North Africa, USA and Europe. The location also offers Techno-Mix the opportunity to deliver outstanding

IKK Group's Vision

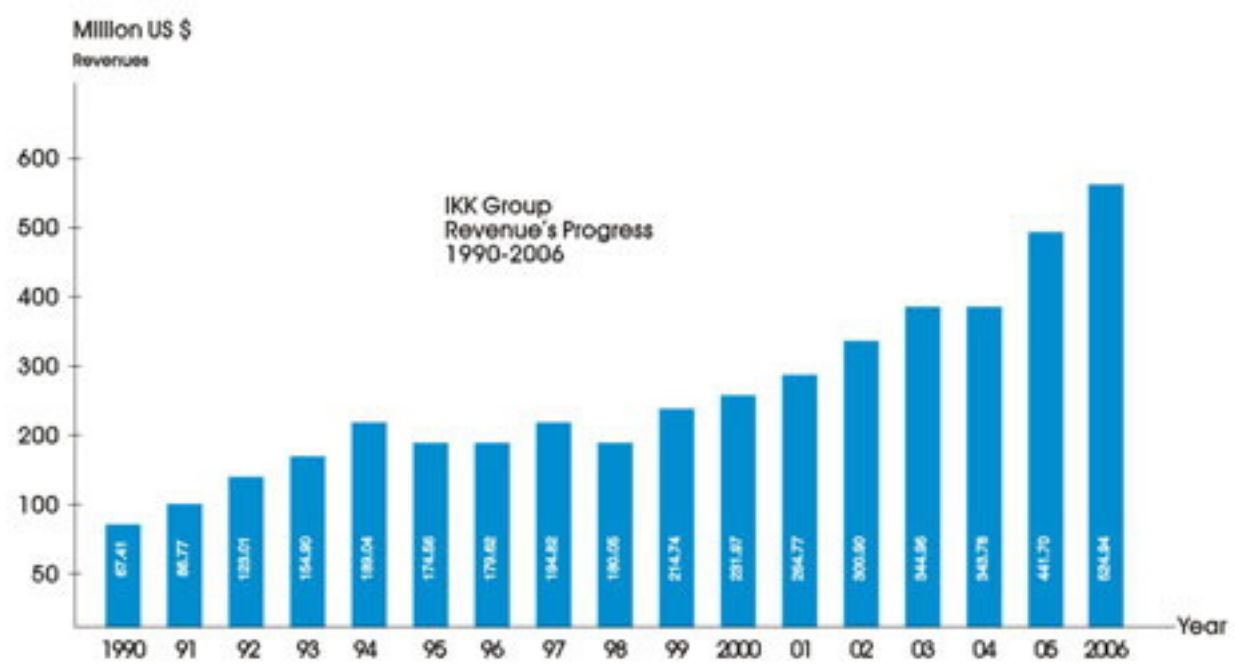

IKK's vision is to remain a major, well-organized and well-diversified business in the construction, industrial and trading sectors across the Middle East. Our aim is to continue the expansion and growth of the business.

The group is developing rapidly with a growth in revenue at the rate of 20-25 percent per annum, which will make IKK a SAR 6 billion conglomerate in four to five years.

Part of the vision is to see the five largest companies in the group form a holding company that will go through an initial public

IKK Group's Sales Progress

A growth in revenue from US \$67.4 million

IKK Group's Rank

IKK ranked high among the top 100 Saudi companies between 2002 and 2006.

techno mix

Introducing of LEED® The rating system of The U.S. Green Building Council

The Leadership in Energy and Environment Design (LEED) Green Building Rating System is a voluntary, but nationally accepted benchmark for the design, construction, and operation of high performance green building in the U.S.

LEED provided a comprehensive rating system for building owners and operators covering all aspects of green building design and construction within six major categories including sustainable site development, water saving, energy efficiency, material selection and indoor environmental quality.

The U.S Green Building Council was accredited as an official Standards Developing Organization by the American National Standards Institute (ANSI).

Techno-Mix, as a member of U.S. Green Building Council, help LEED projects within the categories of water

LEED®

"The LEED® (Leadership in Energy and Environmental Design) Green Building Rating System is the nationally accepted benchmark for the design, construction, and operation of high performance green buildings."

"The 'USGBC Member Logo' is a trademark owned by the U.S. Green Building Council and is used by permission. The logo signifies only that TECHNO-MIX® Sanitary FZCO is a USGBC member; USGBC does not review, certify, or endorse the products or services offered by its members."
