CHOOSE PAINTS WITH ACTIVE BENEFITS

Engineered using cutting-edge technology, our products are designed keeping every functional requirement in mind. From paint that is washable, stain & scratch-resistant for use in living rooms to anti-microbial paint that kills disease-spreading bacteria in hospitals, bathrooms and children's bedrooms, our products are designed to serve every need.

FOR INTERIORS

ActiveWIPE

Imparts Surfaces with dirt & stains resistance!

Search for ActiveWIPE formulation when selecting paints for areas with high-traffic, such as hallways and living rooms, where a hard-wearing, stain-resistant and washable finish is required, and say goodbye to scratches and stains!

ActiveCLOAK

Hides surface imperfections

Look for paints with ActiveCLOAK formulation featuring our unique Triple Bead technology that enables binder molecules to fill up cracks and reflect less light off walls, thereby hiding any defects on the wall surface or due to poor painting technique. Let your walls make a statement without giving away any imperfections.

ActiveSILVER

Kills disease spreading germs & microbes

Our proprietary ActiveSILVER formulation utilizes binder technology with silver ions suspended in the actual paint film. With ActiveSILVER, your walls receive quick-acting, long-lasting protection against disease spreading germs and microbes, imparting them with strong chemical & water resistance for ideal use in kitchens, bathrooms, children's bedrooms and even hospitals.

ActiveENDURE

Resists heat, steam and water

Use paints with ActiveENDURE formulation for interiors or exterior areas, to impart woodwork, metal pipes and even walls to impart strong resistance against heat, steam and water. In addition, ActiveENDURE makes surfaces readily washable to provide extra protection against ambient conditions.

FOR EXTERIORS

ActiveRESIST

Resists dirt and fungal growth

For outdoor and garden walls, use paints with ActiveRESIST formulation, designed to resist dirt particles, and inhibit the growth of mould and fungus on exterior walls. Paints with ActiveRESIST make walls look clean and new all year round.

ActiveSHIELD

Improves surface water and fade resistance

Use paints with ActiveSHIELD formulation for home exteriors. Developed under Kansai's binder technology, ActiveSHIELD imparts UV resistance and crack bridging ability to walls, thereby ensuring that colours last longer and cracks do not appear on the exterior surface.

ActiveCOOL

Reduces surface temperature

Paints featuring ActiveCOOL formulations are developed with binder technology designed to refract infrared rays from sunlight effectively, thereby reducing surface temperatures of buildings, air conditioning costs, and CO2 emissions.

WALLSCAPE VELVET

Luxurious Velvet Sheen

- ActiveWIPE formulation – Imparts walls with stain & dirt resistance
- A luxurious wall coating with a hard-wearing finish
- Dries to a hard, velvet sheen that will withstand repeated washing
- Low-odour – no paint smell when dry
- Quick-drying – two coats can be applied in one day
- Ideal for living rooms, bedrooms, nurseries
- Low VOC product

INSPIRED COLOUR SYSTEM

Kansai Inspired Colour System offers a comprehensive selection of 1470 colours carefully selected and arranged in the following colour families for your convenience:

- Reds
- Oranges
- Yellows
- Greens
- Blues
- Purples

All 1470 colours can be tinted in any one of Kansai's leading quality paints including:

- WALLSCAPE VELVET
- WALLSCAPE CLASSIC
- WALLSCAPE PURE
- NEOGLO

THE COLOUR WHEEL

Kansai Inspired Colour System consists of a range of colours that evenly cover colour space. The colour wheel consists of the following:

3 Primary Colours

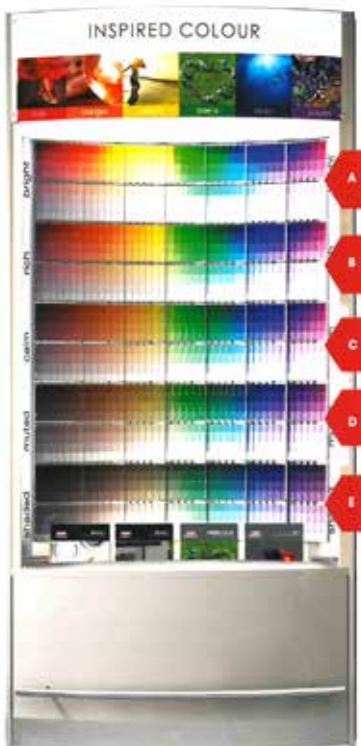

Red, Blue and Yellow.

3 Secondary Colours

Purple, Green and Orange.

6 Tertiary Colours

Red-Orange, Yellow-Orange, Yellow-Green, Blue-Green, Blue-Purple, Red-Purple.

INSPIRED COLOUR

The Kansai Inspired Colour System has further divided the colour wheel to include the following:

- 7 Reds varying in hue from Red-Purple R1 to Red-Orange R7.
- 7 Oranges varying in hue from Orange-Red O1 to Orange-Yellow O7.
- 7 Yellows varying in hue from Yellow-Orange Y1 to Yellow-Green Y7.
- 7 Greens from Green Yellow G1 to Green-Blue G7.
- 7 Blues from Blue-Green B1 to Blue-Purple B7.
- 7 Purples from Purple-Blue P1 to Purple-Red P7.

FINDING THE COLOURS

Each Kansai Inspired Colour has a unique code, for example R3-A1 -4. The first letter and number refers to the hue, so R3 would mean it belongs to the 3rd family of Reds. The second letter and number refers to the degree of muting. In the above example A1

indicates the colour is from the bright, vibrant collection while an E would indicate the most muted. The last number 4 refers to the lightness and darkness of the colour. The number indicates that this is the 4th colour on this stripe card.

NEUTRALS

The best neutrals are found in the range between O6 and Y4 (i.e. the oranges and yellows). For example, Y3-B2-3 is a beautiful off white, while Y3-C2-3 is similar, but slightly darker. Y3-D2-3 is even darker while Y3-E2-3 is the darkest. Notice only the middle letter has changed

GREEN IS NOT JUST A COLOUR TO US...

Kansai Paint accepts and acknowledges its responsibility, not only in creating quality products, but also in encouraging a culture that is dedicated to progressive and sustainable solutions.

We have responded to current environmental situations by innovating unparalleled sustainable solutions based on 3 fundamental pillars of compliance, sustainability and products.

COMPLIANCE = GREEN PROCESSES

Several environmental management systems have been implemented in Kansai Paint Middle East manufacturing plants and in 2008, we attained ISO 14001 certification at our plants.

SUSTAINABILITY = GREEN PRACTICES

Our policies institute strict internal controls to meet or exceed existing regulations. At Kansai Paint, the focus of our R&D spending is to establish and retain industry leadership on environmental sustainability. Through annual review of internal policies and performance, we actively seek to instill a culture of innovation and conservation in every employee to develop progressive and sustainable green solutions.

PRODUCTS = GREEN PRODUCTS

Green is not just a colour to us. We are actively committed to implementing environmentally considerate practices in every aspect of our business. Striving to inspire more ecologically considerate decisions, we have responded to the challenge by innovating to develop a wide-range environmentally friendly products.

All Kansai products have zero lead, glycol, APEO, and Formaldehyde to ensure that our community is a safe and protected. All our architectural coatings contain less than 30 grams of VOC content.
