

Worldwide launch:
Seven new Dekton[®] colours, which offer authenticity and quality

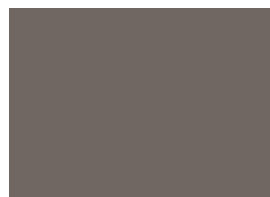

SOLID COLLECTION

- **Ventus, Korus and Galema: Dekton[®]'s new greys and ochres for cutting-edge architecture.**

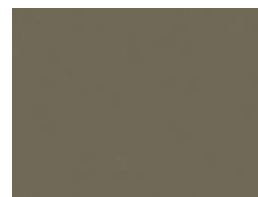

Ventus, Korus and Galema are added to Dekton[®]'s Solid Collection, a range offering only the nuances inherent in the purity and continuity of colour. Ventus, Korus and Galema offer the purest simplicity of greys and ochres, and are outstanding for their smooth, authentic colors, focusing on the essential. This collection already comprises the Domoos colors Sirius, Ananké, Ariane and Zenith.

Ventus

Korus

Galema

TECH COLLECTION

- **Keon: an innovative Industrial Dekton® finish, inspired by the color and texture of concrete.**

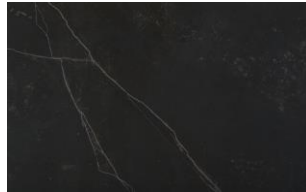

Keon is added to the Dekton® Tech Collection, a landmark collection for its groundbreaking look and its aesthetic industrial slant. Keon embodies a color that evokes the natural appearance of concrete, thus confirming Cosentino's steadfast commitment to noble materials for architectural inspiration. This line is currently comprised of the colours Keranium, Kadum and Strato.

NATURAL COLLECTION

- **Kelya: a new, warm finish for Dekton[®] inspired by natural, dark-colored Spanish stone (e.g. calatorao).**

Kelya is part of the Dekton[®] Natural Collection, a series that reflects Cosentino's desire to emulate the best of what Nature offers. Like all the other colors in this collection Kelya recalls the functionality of the appearance of natural stone. This new color is exceptional for its dark, emphatic appearance and its delicate pattern of veining for the creation of exclusive designs. This range is comprised of the colours Danae, Sirocco, Vegha, Irok, Edora, Aura and Kairos.

WILD COLLECTION

- **Borea and Makai: exclusive Dekton[®] wood finishes, romantic vintage white and dark, solid wood.**

Borea and Makai are two new colors with the texture of wood that in turn make up a new Dekton[®] collection thanks to their distinctive, sophisticated creations: introducing the Wild Collection. This collection allows architects and designers to create spaces that are timeless while at the same time guaranteeing excellent technical performance. While Borea has a dark, deep and solid look, Makai is a cream-colored surface, occasionally interrupted by delicate ochre veining. Dekton[®] currently includes two other colors with a wood finish: Ariane and Ananké, which, due to their smooth look, are part of the above-mentioned Solid Collection.
