Company Profile

Chairman's Message

At National Paints we strive to provide products that help make peoples lives more vibrant and colorful. By way of a brief introduction, since our founding in early 1969 at Amman, Jordan, we have been moving forward at a rapid pace by capitalizing on all growth opportunities, improving our operating efficiency so as to expand on our global presence and to sharpen our product portfolio.

The rapid development of the U.A.E. since it was formed in 1971 has resulted in a massive construction boom, with the nation developing from a collection of small towns into the modern cities of today. The country has established an infrastructure to rival that of any developed country in the world. With so much building activity taking place, there has also been the need for paints, be it for road marking, protecting buildings or simply for decoration. We are proud to say that our company has developed alongside the U.A.E. to become a major player in the global market.

Product quality and customer service are the prime reasons for the company's success. All the raw materials and each batch of paints undergo rigorous laboratory testing to ensure it is of the highest standard. We also ensure that all orders are fulfilled rapidly, with computerized color tinting system being able to immediately produce paints in any chosen color. Thereby, National Paints has today become the largest paint consortium in the Middle East with an annual production capacity of 200,000 tons and more than \$200 million in annual sales. We have around 54 distribution centers located worldwide to serve our customers in the key markets, with paint solutions to meet their needs.

To conclude, I would like to emphasize that National Paints has a clear-cut vision of the future and will always thrive to make its presence deeper and stronger in the local and international markets. A consistent growth pattern will definitely be maintained in its investment and progress.

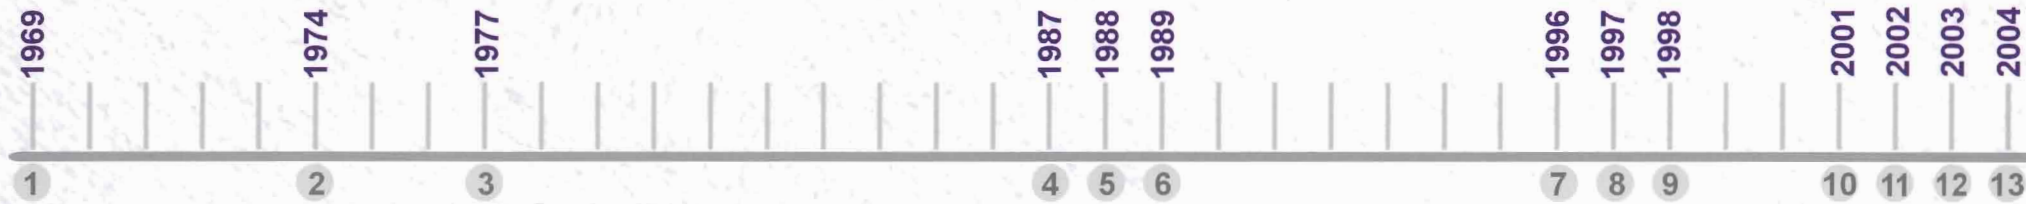

Saleem Al Sayegh
Chairman and Partner

National Paints Factories Co. Ltd.
Sharjah - United Arab Emirates

Decorative Paints

National Paints, offers a full range of products, in the field of decorative paints, which includes water based paints, solvent based paints and solvent free coatings.

These products are used for interior and exterior application to decorate and protect the surface.

A variety of substrates and surfaces, can be painted with National Decorative Paints. These products can be applied using brush, roller, spray, knife etc.

The water based, eco-friendly products consist of Emulsion Paints, Penetrating Primer, Stucco, Stone Finishes and Textured coatings. Speciality paints includes Thermal insulating paint, Acrylic interior and exterior finishes, Stucco Antique marble finish, Silk Touch - designed finish, Pearl Finishes, Acrylic grass finish, Water repellent coatings etc.

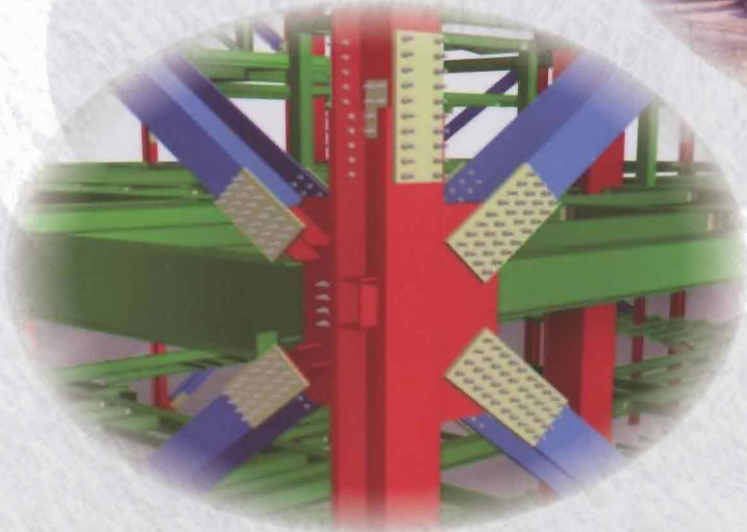

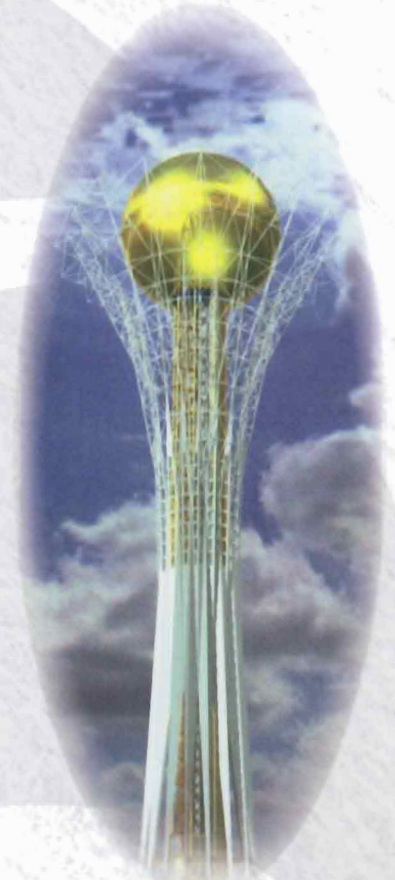

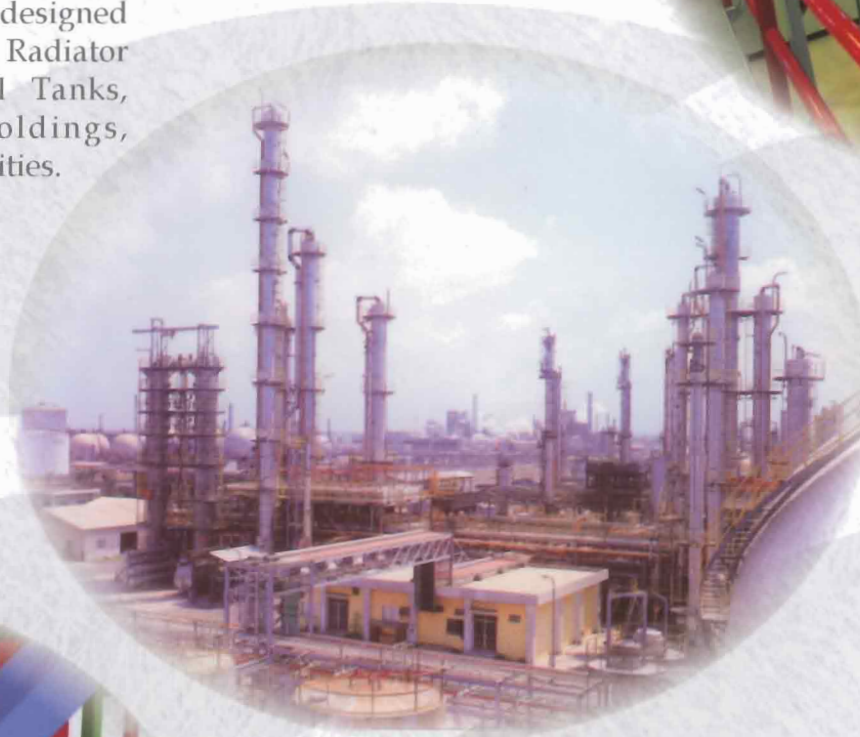

Solvent based products include Synthetic Enamel, Wood Coatings, Nitrocellulose Finishes, Acrylics, Polyurethane and Epoxy Coatings. Newer developments includes Fire Retardant, Intumescent paint, Polyurethane & Polyester, Wood finishes, Universal Wood Stain, Floor coatings, etc...

These paints are used for residential buildings, hotels, auditoriums, restaurants, hospitals, shopping malls, sports complexes etc.

Industrial Paints

National Paints extensive product range is designed to satisfy most industrial needs, and includes products based on NC, Polyurethane's, Alkyd Resin, Epoxies Acrylics for air drying, Stoving and Quick Dry application as high performance coatings for oil, gas and Petrochemical plants. Our industrial product range is also designed for the following: Wood Finishes, Radiator Finishes, Steel Structures, Steel Tanks, Flooring and Screeds, Scaffoldings, Swimming pools and Offshore Facilities.

Marine and Yacht Coating

National Paints is a member of the Transocean Marine Paint Association Holland. The association has strengthened manufacturing and selling of antifouling, anticorrosive and various other coatings for ships, offshore installations, industrial facilities and yachts.

At any shore in the world, you can rely on the Transocean Coatings Customer Service, assuring quality products and quick delivery products at competitive prices.

Powder Coatings

National Powder Coating is applied using electrostatic spraying method whereby the powder particles are electrically charged whilst the substrate remains earthed. This helps to provide a uniform, tough and durable coating.

National Powder Coating is eco friendly and solvent free.

It is suitable for use on interior and exterior surfaces, including ferrous and non-ferrous metals. They are ideally recommended for domestic appliances, metal furniture, architectural work, automotive parts and electrical boards.

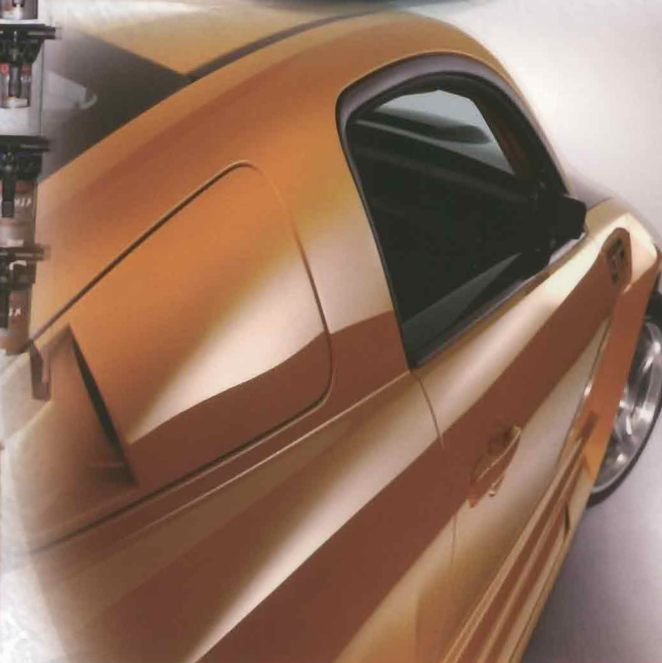

Automotive Paints

National Numix is a Car Refinishing paint system, that is specially designed to suit all types of colors for cars. It consists of the following two kinds of systems, in a variety of colors.

Product consists of, 1K system with base coat, 67 main colors which can be over coated with 2K topcoat clear for more gloss. The second system is 2K system consisting 35 solid colors, topcoat glossy finish.

Numix system gives a wide variety of color combinations that enable the user to obtain colors for different cars of all brands known in the world, through specially designed software. It can also give RAL and BS colors.

Alkyd Resin

In addition to the paint manufacturing activities, National Paints, Sharjah has a modernized resin manufacturing plant with an installed capacity 15,000 metric tons per annum.

The Resin plant is equipped with process controls and automation to produce various types of alkyds for captive use and sales.

Besides the production operation, the plant is having Quality control activities for rigid quality measures and a development laboratory for progressive research.

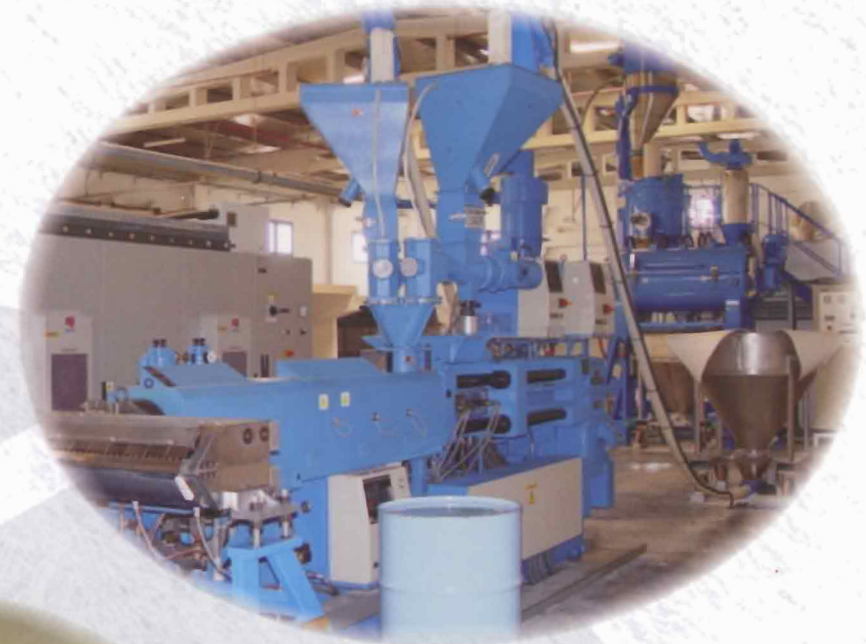

The filtered, approved resin is stored in huge storage tanks and then supplied through pipelines to the paint manufacturing plant.

National PVC Foil

National PVC plant, which began operations in August 2004, is involved in the production of high quality, durable, semi rigid thermoplastic decorative PVC foil.

Its unique characteristics make it the perfect solution for decoration and design needs especially with regard the furniture industry. Our new product is specially for two-dimensional lamination and is strongly recommended for household decoration, office furniture, cabinets etc. National PVC has optical characteristics; it is made of environmentally acceptable material and gives a stain finish.

Research and Development Laboratory

National Paints, has one of the finest laboratories that is used for different technical activities.

The incoming raw materials are tested by analytical chemists for the specified test, before approval and used in production batches.

The finished products are then tested by quality control chemists and finally approved by application chemists before being supplied to customer.

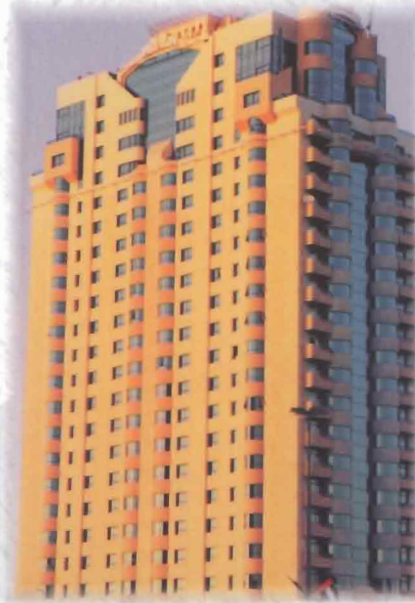

The Laboratory is continuously engaged in new product development as per the customers' needs, requirements and competition.
