Note: None of the Paramount products inside this catalog come with weight plates, bars or collars. These items have been added only for photographic purposes and must be purchased separately.

#### **PLATE LOADED FEATURES**

#### **6 Position Swivel Handle**

The often overlooked axis of motion on converging movements is the wrist joint. The A.R.T. handle pivot aligns with the wrist joint. This feature combined with the single offset axle design pivot allows for complete

articulation of the shoulder, elbow, and wrist creating a movement that is fluid and free from impingement. This feature available on the five rotary models.

### **Choice Of Starting Position**

Select from 3 different starting positions to vary the range-of-motion on FW-800 and FW-1200.

#### **Heavy Duty Axles and Bearings**

1" solid steel pivot axles and lifetime lubricated sealed bearings for friction-free movement and proper alignment. Bearings for Rotary models are encased in machine steel housings for high-precision alignment and enhanced appearance.

## **Heavy Duty Bumper Stops**

Custom heavy-duty rubber molded bumper stops, measuring 2" wide x 1.5" high x 6.5" long, absorb the impact at end of exercise movement.

## **Heavy Duty Optional Plate Storage**

Optional plate storage posts are available on selected models. This bolt on assembly can easily retrofit most FW models.

#### **Custom Molded Feet**

Insure stability and prevents marring of flooring surfaces. Holes with fitted plugs are provided should the facility prefer to anchor machines to the floor.

#### **Exercise Instruction Labels**

Step-by-step instructions and anatomical illustrations on non-fade, washable Lexan for maximum durability.

#### **Seat Adjustments**

Heavy-duty 4" x 2" frame with easy to adjust 1.5" x 3" slide tube assembly for proper positioning during exercises. Sleeves are a custom extrusion mounted with hardware to provide precise, tight fitting adjustments.

#### **Protective Coverings**

Non-slip textured rubber coverings eliminate scuff marks on base frames.

#### SPECIFICATIONS - FW MODELS

Squat Press FW-300 shows specification call-outs general to the Plate Loaded Series.

- Frames 4" x 2", 3" x 3", 3" x 5", 2"x 2" and 1.5" x 3" tubular steel with a minimum of 11-gauge thickness. Cold rolled steel mounting plates of 1/4", 3/8" and 1/2" used throughout for proper structural reinforcement.
- Step by Step Instruction Non-fade Lexan charts include easyto-follow instructions.
- Powder Coat Finish Electrostatically applied powder coat finish enhances appearance and durability.
- Hardware All frame bolts are 3/8" and 1/2" grade 8 for maximum durability. Hardware is zinc gold dichromate-coated and zinc phosphate-coated to eliminate corrosion.
- ⑤ Upholstered Pads Superior grade Boltaflex and Uniroyal Naugahyde® are available in a wide choice of colors. Pads are made with 1.5" high-density EMR and a .5" high-density, high ILD urethane cushion layer for comfort. Rebond urethane foam and Poron® used in high load application areas.
- Axles and Bearing 1" solid steel pivot axles and lifetime
   lubricated sealed bearings for friction-free movement and proper
   alignment. Bearings for Rotary models are encased in machine
   steel housings for high-precision alignment and enhanced
   appearance.
- Second Footplates Solid 1/4" and 1/8" steel footplates encased in custom molded SBR High Durometer coverings eliminate slipping and enhances appearance.
- Custom Molded Feet Insure stability and prevent marring of flooring surfaces. Holes with fitted plugs are provided should the facility prefer to anchor machines to the floor.

#### **SPECIFICATIONS - PFW MODELS**

3 Way Press Bench PFW-8200 shows specification call-outs general to the Free Weight benches, racks and accessories.

- Bar Catches Replaceable chrome bar catches with ABS wear strip.
- Powder Coat Finish Electrostatically applied powder coat finish enhances appearance and durability.
- Upholstered Pads Superior grade Boltaflex and Uniroyal Naughahyde® are available in a wide choice of colors. Pads are made with 1.5" high-density EMR and a .5" high-density, high ILD urethane cushion layer for comfort. Rebond urethane foam and Poron® used in high load application areas.
- ❸ Hardware All frame bolts are 3/8" and 1/2" grade 8 for maximum durability. Hardware is zinc gold dichromate-coated and zinc phosphate-coated to eliminate corrosion.
- Adjustment Pin 1/2" precision machined cold rolled steel spring-loaded pin used on all adjustments.
- ₱ Bearings On selected units pillow block sealed ball bearings are used at the pivot points for friction-free movement and precision alignment.
- Bronze Bushing Assembly Wide pivots with 1" axles and bronze bushings provide solid angular adjustments.

## **PLATE LOADED SERIES**

## **Rotary Chest Press**

#### FW-800

- Unilateral press arms featuring Paramount's patented Advanced Rotary Technology®.
- Press arms easily adjust providing a quick choice of 3 different starting positions.
- Unique 6-position pivoting handle aligns with wrist to eliminate joint stress.
- Heavy-duty 6-position seat assembly with spring loaded positive locking pin.
- Available with up to 4 optional weight plate storage posts.

## **Rotary Incline Chest Press**

#### FW-1200

- Unilateral press arms featuring Paramount's patented Advanced Rotary Technology®
- Press arms easily adjust providing a quick choice of 3 different starting positions.
- Unique 6-position pivoting handle aligns with wrist to eliminate joint stress.
- Heavy-duty 6-position seat assembly with spring loaded positive locking pin.
- Available with up to 4 optional weight plate storage posts.

## **Rotary Shoulder Press**

#### FW-1100

- Unilateral press arms featuring Paramount's patented Advanced Rotary Technology®.
- Counterbalanced press arms minimize starting resistance.
- Unique 6-position pivoting handle aligns with wrist to eliminate joint stress.
- Heavy-duty 6-position seat assembly with spring loaded positive locking pin.
- Available with up to 2 optional weight plate storage posts.

## **Rotary Lat Pulldown**

- Unilateral press arms featuring Paramount's patented Advanced Rotary Technology®.
- Unique 6-position pivoting handle eliminates stress to wrist joint.
- Durable 3-position hold down pad and 6-position seat assembly with spring loaded positive locking pin.
- Compact low-profile design minimizes floor space requirements.

### **Rotary Row**

#### FW-1300

- Heavy-duty 6-position seat and chest pad assemblies with spring loaded positive locking pin.
- Large foot plate design with custom molded rubber cover for user stability and improved ergonomics.
- Unilateral press arms featuring Paramount's patented Advanced Rotary Technology®.
- Unique 6-position pivoting handle eliminates stress to wrist joint.
- Compact low-profile design minimizes floor space requirements.

## **Biceps Curl**

#### FW-600

- Unique off-axis pivot eliminates the strict positioning of elbow joint during exercise movement.
- Added counterbalance weight plate post located behind pivot allows reduction of initial resistance level.
- Open frame design allows unobstructed entry and exit of machine.
- Heavy-duty 6-position seat pad assembly with spring loaded positive locking pin.
- Compact low-profile design minimizes floor space requirements.

#### **Standard Seated Row**

#### FW-400

- Extended seat pad accommodates varying body length.
- Large foot plate design with custom molded rubber cover for user stability and improved ergonomics.
- Unique dual rotating and pivoting handle assembly allows unencumbered exercise movement.
- Large structural frame with centered pivot provides balanced lift when using heavy weights.
- Compact low-profile design minimizes floor space requirements.

## **Triceps Extension**

- Rotating and pivoting handles allow variances in starting position and results in natural arcing motion.
- Angled back pad and fixed seat position provides stability while placing user in proper exercise position.
- Press arm is counterbalanced keeping resistance consistent throughout the exercise movement.
- Compact low-profile design minimizes floor space requirements.
- Available with up to 2 optional weight plate storage posts.

## **Squat Press**

### FW-300

- Conveniently located gravity biased stop lever allows ease of entry and exit.
- Secondary stop provides complete range of movement for taller users.
- Large foot plate design with custom fitted rubber cover for user stability and improved ergonomics.
- Compact low-profile design minimizes floor space requirements.

## **Standing Leg Curl**

#### FW-1600

- Self-adjusting roller pad and unique offset pivot accommodates wide range of user heights.
- Angled chest pad, hip pad and contoured handgrips facilitate proper exercise position.
- · Large foot platform and heavy structural frame provides optimum stability during exercise movement.
- Heavy-duty 5-position chest pad assembly with spring loaded positive locking pin.
- Compact low-profile design minimizes floor space requirements.
- Available with an optional weight plate storage post.

## **Leg Extension**

#### FW-100

- Unique off-axis pivot with exercise range of 110° but only 80° of arm travel minimizes resistance drop-off.
- Easy grip 7-position adjustable back pad assembly with spring loaded positive locking pin.
- Self-adjusting roller pad and unique offset pivot accommodates wide range of user heights.
- Compact low-profile design minimizes floor space requirements.
- Available with up to 2 optional weight plate storage posts.

## **Horizontal Leg Curl**

- Self-adjusting roller pad is counterbalanced to minimize rotation during exercise movement.
- Unique off-axis pivot with exercise range of 120° but only 80° of arm travel maintains resistance profile.
- Dual handgrip position and angled chest pad facilitates proper exercise position.
- Compact low-profile design minimizes floor space requirements.
- Available with an optional weight plate storage post.

## **Total Leg**

#### FW-8800

- Unique design provides a more natural leg press movement unlike conventional hack squat machines that
  move in a strict linear path. The arc movement allows the user to maintain the proper knee to ankle position.
- Dual safety catch system located within the peripheral view of the user.
- Weight plates are back loaded to add resistance. The unique counterbalance design also allows the user to front load weight plates to reduce the initial load.
- The heavy duty lifting assembly has 35mm sealed bearings and a 1 3/8" solid steel pivot axle.
- The main frame provides maximum stability with the use of 5" x 3" structural steel tube.

## 45° Leg Press

#### FW-7800

- 4 premium grade linear bearings are load rated to 1,300 lbs. providing optimum performance and durability.
- Dual-position catch mechanism plus a 4-position secondary stop mechanism for ease of entry and exit.
- Headrest and back pad adjust to 8 different user positions.
- Wide foot plate for secure placement and variance of foot position when initiating exercise movement.
- 3 weight storage posts are standard.

#### **Total Chest**

#### FW-8700

- Easily adjusts to 3 positions: Supine, 30° Incline, and 20° Decline.
- Unilateral press arms featuring Paramount's patented Advanced Rotary Technology®.
- Adjustable arm stop assembly allows for 3 different starting positions.
- 9 position adjustable handles with sealed bearings.
- 3 position seat and dual position footrest to accommodate wide range of users for each exercise.
- 3 weight storage posts standard.

## **Total Shoulder**

- Overhead press, rear deltoid raise, shrug, and upright row.
- Angled shoulder press grips assure proper alignment through range of motion.
- Adjustable arm assembly quickly transitions from one exercise position to the next.
- Easy entry/exit pivoting seat.
- Conveniently located heavy-duty spring loaded adjustments.
- Upright row handle bearings provide smooth rotation through range of motion.
- Weight storage posts standard.

# BENCHES, RACKS & ACCESSORIES

## **Smith Press**

#### XFW-6800

#### **Open Frame Design**

Walk through frame facilitates easy positioning of exercise benches.

#### Frame

Heavy-duty 3 7/16" x 2 1/4" x 11 gauge oval shaped tube for durability and enhanced aesthetic value. Laser cut and welded frame components intersect for added structural support. Frame with electrostatically applied power coat finish, available in metallic silver, semi gloss black texture and gloss white texture. Optional colors also available upon request. Thick-gauge steel flange plates under base frame allow anchoring of unit, if desired.

#### Lifting Arm

Counterweighted lifting arm reduces starting weight to just 14 lbs. Maximum loading capacity of 540 lbs. (12 ea. 45 lb. plates). Bar is chrome plated and knurled for durability and ease of gripping.

#### **Weight Carriage**

Carriage is angled 3 degrees to accommodate rotation of anatomical joints during exercise. This combined with Thompson Super 16™ linear bearings provides a smooth vertical movement at maximum weight loads. Weight carriage load tested 500,000 cycles at maximum loading capacity to insure structural reliability.

#### **Bar Catch Assembly**

Rotating bar catch design easily fits into the catch slots for each of the 8 height positions to accommodate multiple exercise movements.

#### Stop Assembly

Easy-grip dual stops allow user to limit the range of movement, when desired. Rubber bumpers absorb shock load.

#### Weight Storage

Unit comes standard with 8 separate posts for storing weight plates.

The XL-6700 is designed as a complimentary bench to the XFW-6800 Smith Press.

Decline position.

One of several incline positions.

## Flat / Incline / Decline Bench

#### XL-6700

#### **Bench Positions**

Versatile bench adjusts into 11 positions ranging from 10° decline to 85° incline. Each position clearly marked in degrees on adjustment disk.

#### **Seat Pad Positions**

Seat pad adjusts to 3 positions to accommodate multiple exercise positions.

#### Portable

Lifting handle and rear wheels for ease of portability.

#### Sturdy Frame Design

Load tested 1,000,000 cycles at 500 lbs. to insure structural reliability.

#### Streamlined Design

Front on bench streamlined to prevent marring of base frame. Frame with electrostatically applied power coat finish, available in metallic silver, semi gloss black texture and gloss white texture. Optional colors also available upon request.

#### Easy To Use

Heavy-duty back pad adjustment is spring loaded for ease of operation.

## **Squat Rack**

## PFW-5100

- Multiple bar catches for 7 starting positions, plus a catch rail, sand-blasted and chrome-plated for maximum wear-resistance.
- 4 Weight storage posts come standard with this model.

## 3 Way Press Bench

### **PFW-8200**

30° Incline

- Easily adjusts into 3 positions: Supine, 30 degree incline, 20 degree decline.
- 3 position seat and dual position foot rest to accommodate wide range of users for each exercise.
- 3 replaceable chrome bar catches per side with heavy-duty wear strip.
- Together the bench pads taper from 9" to 17" for proper support.

## **Supine Press Bench**

#### PFW-7100

- Nine-inch bench width allows free shoulder movement during bench press.
- 3 replaceable chrome bar catches per side with heavy-duty wear strip.

## **Incline Press Bench**

#### PFW-7200

- Fixed 30° angled seat back for optimum exercise benefit.
- 3 replaceable chrome bar catches per side with heavy-duty wear strip.

20° Decline

#### **Decline Press Bench**

#### PFW-7600

- Padded bench is 16" wide for hip support tapering to 8" for free shoulder movement.
- 3 replaceable chrome bar catches per side with heavy-duty wear strip.

## **Plate Holder Option**

#### PFW-PH

This optional feature is specifically designed for models PFW 7100, 7200, 7600 and 8200.

#### **Preacher Curl**

#### PFW-5000

- Precise arm pad angle with comfort edge roll.
- Adjustable seat.
- Dual rests allow safe plate loading.

#### **Lever Row**

#### PFW-5500

- Nonskid foot platform.
- Both wide and narrow handgrip.
- Heavy duty swivel plate rack assembly handles up to 11-45 lb. plates.

#### **Roman Bench**

#### PFW-5600

- Unique 45° angle for proper ergonomics.
- Adjustable thigh pads have wide support with lock down.
- Nonskid foot platform offers wide support with two roller pads.

#### **Seated Calf**

#### PFW-5700

- Pivoting seat with adjustable thigh pads.
- Nonskid footrest.

## **Abdominal Crunch**

#### PFW-5300

- Angled back pad limits use of lower back muscles.
- Dual rollers adjust.

## Vertical Knee Raise/Dip

#### FW-6400

- Pads and grips provide stability and proper body positioning.
- Foot plates ease entry.
- Compact footprint.

### **Dumbbell Rack**

#### PFW-4700

Rack only. Capacity to hold 10 pair of dumbbells.

**Flat Bench** 

#### PFW-7000

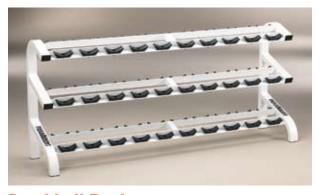

- Multi-use exercise bench.
- Small base end for unrestricted use.

Weight Plate Tree

#### PFW-6300

Tubular steel tree features 5 storage posts that holds over 500 lbs. of plates and collars.

## **Dumbbell Rack**

## PFW-4800

Rack only. Capacity to hold 15 pair of dumbbells.

### **Decline Bench**

#### PFW-7400

- Adjustable from 15° to 35°.
- Fixed rollers provide stability.

**Beauty Bell Rack** 

#### PFW-4900

Rack only. Capacity to hold 10 pair of Beauty Bells.
