

The World's Largest Building Products Information Network

AEC Online delivers up to date information about building products and services, including product details, brochures and specifications in a cost efficient and eco-friendly way to architects, contractors, developers, operators and maintenance companies in the Middle East and surrounding areas.

Introduction

The regional portal, www.aeconline.ae, is a part of the AECinfo network with more than 20 product information portals in Europe, North America and the Middle East. The network was created by the Swiss-based Docu Group in 2002 and has since then seen a steady growth in geographical coverage and content, through acquisitions and partnerships. The sites have over 1.5 million visitors a month and consist of more than 300,000 companies, 700,000 products and over 900,000 brochures, catalogues, specifications, technical information and drawings.

Through AEC Online, architects, contractors and developers can easily access company and product information. Brochures, catalogues, specifications and CAD details are available for download. The portal's automated RFI (Request For Information) system enables users to request product clarifications, printed material etc. from one or multiple companies in a simple operation.

Listing your Company with AEC Online

The initial listing on AEC Online is **free**, and any company operating in the building and construction industry can visit www.aeconline.ae and register their company details. For those who want to have a more prominent listing and product presentations, brochures, catalogues and technical details included, different alternatives of **Enhanced Listing** are available.

Enhanced Listing

Enhanced Listing with company logo, product details, brochures, catalogues, specifications and drawings is charged at a nominal fee. Compared to the cost of printing and distribution of brochures and technical information, the cost of using AEC Online is very low. Companies with Enhanced Listing will also have their products and services included in newsletters and banner advertisements.

AEC Online is listed with the largest search engines and the more information you have about your products and services, the more likely it is that those looking for these types of products and services will see your company instead of the competitors. Companies with Enhanced Listing will also get a higher ranking search and become more visible on AEC Online.

The different elements of the Enhanced Listing are described below and the price varies depending on the number of products, brochures/catalogues, specifications, drawings etc. being presented on AEC Online. For more information about the alternative packages, please see separate price list or contact us on for a special quotation.

Company Logo

Presenting your company with a logo makes it stand out towards the competition.

Gulf Sondex FZCO

City: Dubai
PO Box: 18359

Company type: Manufacturer

Sondex was established in 1984 with a strong and simple mission; to strive to be the best and to keep every single promise to the customer. Today, this Danish company is well known for its impeccable performance, innovative products and for its enduring credibility.

Over the decades, all this has contributed to the phenomenal success of the company. An impressive market share and flawless reputation are the hallmarks of Sondex.

The brand has grown and achieved an indelible presence in Europe, USA, the Far East and the Middle East. Our sister companies in USA, Australia, Poland, France, U.K., Netherlands, Italy, Germany, Romania provide a strong network of agents and suppliers on a global scale. With a working team of 350 employees, the company is well prepared to meet the escalating demands of the industry.

In a region where cooling is required round the clock, round the year, the role of heat exchangers is optimal. Right from HVAC, Oil & Gas, Marine, Food & Dairy and other individual applications the need for high quality heat exchange systems is always on the rise. The products are both compact and efficient and the after sales service matches the best on offer. Naturally, Sondex has gained the trust of clients and

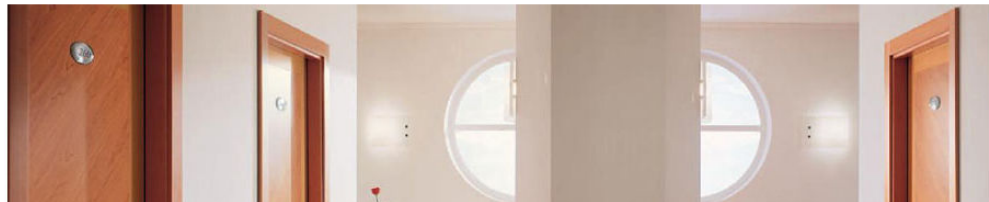

COCIF Middle East

Address: Arjaan Tower, Office

Company type: Manufacturer

COCIF is producing standard and customized interior doors, exterior doors as well as fire rated doors with different Italian and British systems and standards that are approved by local authorities and complying with local civil defence regulations as COCIF being a member of BM-TRADA certification party (FD30,FD60 & FD90). COCIF is supplying its products for the Italian, European, Russian, Indian, Chinese, Japanese, South African, North African as well as the Middle Eastern Markets.

COCIF has given the GCC market a special importance because of the great current potential resides by having a marketing office dedicated to follow up our clients in the region and to introduce our products to new possible clients.

Search Keywords and Categories (CSI Master Format)

AEC Online has a strong built in search engine that can locate companies and product information in a fast and efficient way. For easy search purposes, every product or service presented will be linked to relevant categories and a range of keywords.

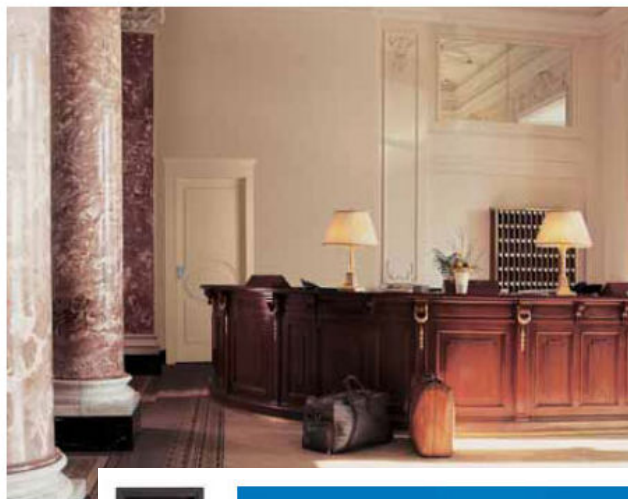

Companies with Enhanced Listing will get a higher ranking and have their logo presented on the search results. This makes them stand out towards the competition.
