8	Operator	Hi-tech operator for Garage / Industrial doors with safety features, remote/push button control options.

HARDWARE

Premium product hardware imported from European hardware specialists.

● Track system

The vertical and horizontal rigid industrial track is made of galvanized steel. The tracks are designed to suite any site condition (refer drawing).

● Springs

Torsion springs are made of shot peened galvanized spring wire in accordance to Din 17223. Consistent quality is guaranteed by applying powder coating electrostatically. This enameling process protects spring against corrosion and gives top quality. Springs are rated for 20,000 upto 100,000 operations.

● Hinges/Rollers

Hinges are made of 2.5mm plated steel and heavy duty Nylon rollers of 46.5 mm outside diameter with high quality ball bearing.

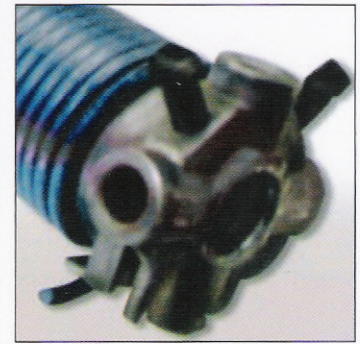

● Standard Fittings

- ◆ Spring bumper (stopper).
- ◆ Nylon black handle.
- ◆ Pull down rope.

● Options

- ◆ Oval or rectangular windows.
- ◆ Security lock.
- ◆ Chain hoist.

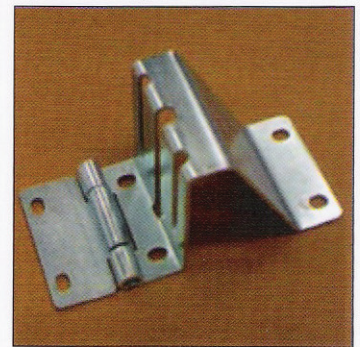

● Standard colours
