CONCRETE POOLS by OASIS DREAMS

For ultimate in style, choose a customized concrete pool design with spectacular interiors to match. Concrete pools offer *greater design flexibility* and can be constructed in any *Shape, Size and Depth*. We can turn your pool dreams into reality in a matter of 6 to 8 week depending on the complexity of your project. We construct concrete Residential as well as Commercial Pools of different types, such as:

- Skimmer Pools
- Overflow Pools
- Reflecting Pools
- Infinity Pools or Vanishing Edge Pools
- Beach Entry or Zero Entry Pools
- Plunge Pools
- Counter Current or Exercise Pools

Spas, Slides, Fountains or Waterfalls with pools can also be added.

The Following is a general guide to what one would expect during the building process:

- Excavation
- Leveling
- PCC
- Block Work
- Steel Reinforcement
- Shotcrete
- Coping
- Plaster/Screeding
- Waterproofing
- Tiling
- Grouting
- Electromechanical Works
- Filling and Commissioning

We also do renovation work for old pools.

No project is too small or big for us; we construct pools for single villas to big projects. We are at the moment busy with development off the coast of Abu Dhabi on an Island called Nurai Island, we are doing the construction and finishing of all the swimming pools and water features on this pristine project.

The Nurai Island:

The 130,000-square-meter island is being morphed into an enchanting and lavish resort along with exclusive private residential estate at a cost of AED. 3 Billion. The property will consist of one boutique luxury hotel resort with 60 suites (Room rates ranging from \$ 3,500 to \$ 5,000 per night), 31 beachfront estates and 36 water villas (Priced between AED. 35 Million and AED. 110 Million). At the helm of the residential project is New York based Studio Dror, led by Dror Benshetrit and the Paris-based firm AW2 has designed the hotel. The two agencies are collaborating on the project.

The multi-story water villas alone will span 515 square meters each and comprise three bedrooms, four bathrooms, and a private rooftop garden with spa pool, private infinity pool, multiple decks, outdoor barbeque area, gourmet kitchen and concealed service quarters. The private Seaside residences will feature five-bedroom and six-bathroom estates spanning between 3,000 and 6,050 square meters. These will include a private beach and garden, rooftop garden with spa pool, infinity swimming pool, indoor reflecting pools, concealed service quarters, entertainment patios, outdoor dining areas, chef and show kitchens, and outdoor showers. The island can either be reached by a helicopter or by private yachts; it also offers a private helipad and marina with arrivals lounge, a fully-equipped spa and fitness centre, private beaches and water sports facilities
