THERMO-SHIELD EXTERIOR

Thermo-Shield Exterior Wall Coats are highly efficient, energy-saving, flexible coatings designed to insulate and waterproof exterior walls. They are non-toxic, friendly to the environment, and form a seamless membrane that bridges hairline cracks. They are completely washable and resist many harsh chemicals and dirt pick-up. These water-based coatings are made from an acrylic resin system filled with vacuumed ceramic microspheres that acts as a thermally efficient blanket. Thermo-Shield Exterior Wall Coats put a stop to the “frequent painting cycle” – they outlast other paints several times over.

-  Solar Reflective Index: 110 *
-  Reduction of energy used and cooling costs
-  Downsizing of air-conditioning equipment

* WHITE COLOUR
