

OSLER[®] 90° Corner Basket

An innovative design by OSLER for a 90 degree corner requirement. An aluminum corner piece is designed to join any module of OSLER platforms at the corner. It works as a Corner Module for the OSLER platform modules. It works only with the use of C-type Stirrups.

Adjustable angle corners are also available upon request.

FEATURES:

- Fast, Light Weight & compact Design
- Unlimited Working height
- Reliable
- Designed according to the BS EN 1808 1999 International Standard
