

H₂Okinetic™ Showers. The feeling of more water, without using more water.

IT'S TIME TO EXPERIENCE **MORE.**

An **H₂Okinetic™ Shower** is different than any other shower experience—in the way it feels and the way it performs.

Large water droplets move in a unique wave pattern, providing warmer, more drenching coverage. And efficient engineering keeps water usage—and the operating costs associated with it—under control.

More coverage.

More warmth.

More unforgettable.

THE SCIENCE BEHIND THE EXPERIENCE.

H₂Okinetic™ Showers look different, because they are different. The result of extensive research and development in the science of fluidics, H₂Okinetic Showers harness the natural energy of water unlike any shower has before.

Inside the showerhead, water is channeled through a series of strategically placed, highly engineered chambers that create velocity and sculpt the water into a unique wave pattern that blankets the body with coverage. And all this happens without any internal moving parts that could break or degrade over time.

It's the feeling of more water, without using more. And it's revolutionizing the way customers think about showers.

CONTROLLING THE WAY THE WATER MOVES.

RESULTS YOU CAN SEE. AND FEEL.

MORE COVERAGE

H₂Okinetic Showers provide 3X the coverage of a standard shower.*

MORE WARMTH

Larger water droplets and a dense shower spray pattern result in a warmer shower experience.

MORE INTENSITY

The unique wave pattern and velocity of the water create the feeling of more pressure.

EFFICIENCY IS BUILT IN.

Available in a variety of water-efficient and WaterSense® labeled options, H₂Okinetic Showers are designed to feel like more water than standard showerheads at the same flow rate.
