

# Greenhouse Covers

## REEF GREENHOUSE COVERS

The health of your plants directly impacts the health of your business. A high quality greenhouse cover can help protect your bottom line for years. Griffolyn® internally reinforced polyethylene greenhouse covers have been performance engineered to be highly resistant to tears and punctures with an exceptional ability to retain strength and flexibility in the most extreme temperatures.

### FEATURES

- UV stabilized to minimize the deteriorating effects of the sun
- All greenhouse covers can be custom fabricated to meet your exact needs
- Available in white, clear and black
- The patented high-strength cord reinforcement grid gives the unique combination of extreme tear resistance for extra durability while remaining lightweight and flexible for easy handling
- Additional features such as pipe loops, grommets and zippers can be included to meet your installation needs
