Bathroom and Kitchen Fittings

KLUDI

RAK

"We Stand for water Saving"

GERMAN FAUCETS MADE IN UAE

KLUDI RAK *fittings – quality of life every day*

Fittings accompany us throughout our daily routines. We come into contact with them all the time in the bathroom and kitchen.

This gives rise to certain wishes and expectations for form and function. KLUDI RAK understands these requirements – and implements them in products that are perfectly finished and that combine timeless design, innovative technology and superior-quality materials.

This is how we create mixer and showers that are more than just regulated water conductors – they represent a certain quality of life.

We also set store by this closeness to people in our company.

In numerous countries throughout the world, KLUDI RAK's employees take personal care of requests from our customers and partners.

They know: they can rely on KLUDI RAK – and can expect a lot more in future.

As a manufacturer of fittings, we are conscious of our responsibility to be more economical in our use of water. Environmentally friendly production methods and smart use of resources are therefore a longterm obligation for us. With KLUDI RAK Water Saving, we implement this promise with products that save water – for the future of our planet.

Electronic Basin Mixer

KLUDI RAK 1st ELECTRONIC BASIN MIXER

RAK 3810105
Sensor Electronic Basin Mixer DN15

RAK 3810005
Sensor Electronic Basin Mixer DN10

Feature

- Electronic fittings in the successful and attractive KLUDI RAK Zensor Design
- To the last detail: the sensor window is designed to fit the series character, red / blue marker by single lever basin mixer.
- Adaptable with battery (9V alkaline)
- Can also be operated with 6V lithium battery.
- Flow rate 5.0 L / min at 3 bar and thus saves water, saves resources!
- Low power consumption (energy efficiency Level 5)

PARAGON

Extravagant and yet natural at the same time – that is the beauty of Paragon. These highly contemporary fittings provide a winning combination of innovative joystick technology and cascade aerator. The joystick allows the water temperature and quantity to be regulated with ease, comfort and precision while the cascade aerator in both basin and bath resembles the natural flow of water in the wild.

PROFILE

THE ELEGANT MATCH
FOR CREATIVE
THINKING

The clear, geometric lines of the Profile range with their precision-honed edges and surfaces give this range of fittings a classy and elegant look. A slight curve to the spout represents the natural pattern of gently flowing water.

The bidet fitting has a special ball joint inside which allows the design to continue on through the spout. The integrated aerator in the bath fitting enables the angle of the flow to be adjusted, giving greater flexibility and reduced splash.

PASSION

THE TIMELESS
INNOVATIVE DESIGN

This classic combination of rounded and angular shapes is a timeless design that fits in well with all architectural bathroom styles. Passion offers innovative solutions, bringing greater flexibility to both bathroom and kitchen.

In the bathroom, the shower fitting can rotate 180 degrees and boasts an ultra-flat hand-held shower with a voluminous rain shower spray. In the kitchen the spout can be turned a full 360 degrees, creating plenty of free space at the sink.

PRIME

THE BEAUTY OF
GEOMETRIC
ORDER

In the bathroom the simple, rounded design of this range is characterised by the minimalist handle. It also offers a wide range of different products, in particular for the shower. First choice for any architecturally striking kitchen, Prime rejoices in flowing lines and a curved spout. It is available as a single-lever mixer or a two-hole fitting.

HARMONY

"HARD TO MEASURE -
CLEAR TO OBSERVE"

The designs combine contemporary style with high functionality and technology to add a special touch of harmony to your kitchen sink, bathtub, shower, bidet and washbasin.

Innovative features in the Harmony series include swivel cascade aerator solutions that bring greater flexibility to both bathroom and kitchen, by enabling the angle of flow to be adjusted to have different splash options and resemble the natural flow of water.

PROJECT

THE STYLISH AND THE DYNAMIC

The Project range is marked by dynamic, flowing forms with rounded edges, allowing it to fit well into any style of bathroom. The high quality, complex interior design of the tap with its ceramic cartridge or ceramic upper parts guarantees long-term durability while a high-grade chrome surface provides the finishing touch for all those looking for top quality fittings.

WE STAND FOR WATER SAVING

Water is one of the most valuable and scarce resources that we have. Here at Kludi Rak we are very aware of this. This is the reason why we use only the best and highest quality aerators on our fittings. An aerator is a key component of every faucet, which is integrated into the spout at the front and forms the water jet.

Save up to
60% water

Constant
flow rate

And this is how we do it:

We use aerators with which it is possible to achieve a water saving of 60% at the wash basin compared to regular products. The water flow at the wash basin can therefore be reduced by up to 6 l/min.

For our fittings we also use, amongst others, aerators that make it possible to adjust the jet angle directly on the fitting itself. This has the advantage that individual adjustments can be made to the jet to suit every form of wash basin. Whether upwards to a more shallow outlet angle or downwards in a steeper angle. It also results in less splashback.

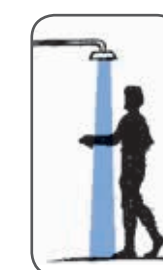

We use flow regulators, which ensure a constant flow rate regardless of pressure fluctuations and which guarantee an even distribution of water. An even distribution of water is particularly important in commercial and institutional installations. It also saves water and therefore energy.

KLUDI AMBA

The Gentle beauty

KLUDI AMBA is the very essence of a new aesthetic style. Softer contours and intuitive operation define the comprehensive line of mixers, which includes all accessories. Its sculptural appearance with sensory qualities and the unique KLUDI IntegralDesign make it simply uniquely beautiful.

Intuitive, natural operation

KLUDI AMBA is intuitive to operate, by following the natural line of movement towards the mixer and gently opening up the top of the mixer towards the back. A light touch is enough to start the water flowing. Temperature is regulated with a simple, practised turn. As usual, it can be finely adjusted with pinpoint accuracy.

Finely adjusted with pinpoint accuracy
As usual, the flow of water and temperature are easy to adjust with pinpoint accuracy. Proven cartridge technology is used for the fine adjustment, which is also integrated into KLUDI AMBA.

Discreet marking
The red and blue marking blends discreetly into KLUDI AMBA's overall design.

Graceful drainage fittings
Instead of the entire connecting rod, only the elegant pull knob is visible for the drainage fitting of the KLUDI AMBA mono basin mixer. It butts against the mixer body. As an alternative to a drainage fitting, KLUDI AMBA also provides a push-open valve in the washbasin.

KLUDI BALANCE

Complete harmony

KLUDI BALANCE radiates soothing calm. Crisp lines are combined with gentle curves in a timeless design, which is the perfect match for discriminating bathroom concepts. The lever seems to float above the mixer body. Fitting like a glove on the hand with its beautiful lines, it regulates the flow of water precisely.

524450575
single lever bath- and
shower mixer DN 15

Superior quality design and an appearance with sophisticated details

The plane, highly polished surfaces of the mixer body are produced in a complex process. The diverter for the shower function has been integrated. It is easy to grasp by the crosspiece even with wet hands. The mixer body cleverly conceals the escutcheons – superior quality design and an appearance with sophisticated details.

hygiene

Fine design and modern technology transform bathrooms into personal oases for relaxation. Just turn off the stress, KLUDI fittings make it possible.

Award-winning design and functions

The single lever basin mixer from the KLUDI BALANCE range was awarded the renowned iF product design award in 2012 for the harmonious interplay of naturalness and functionality. It impressed with its timeless design.

The electronic basin mixer with sensor technology was given the Plus X Award for high quality, design and ease of operation. Just hold your hand in the sensor zone, which is clearly marked, and the water will start running immediately – hygienic and clean, as there is no need to actually touch the mixer. When you move your hands away, the water will stop running immediately. This saves water and energy.

KLUDI ZENTA BLACK & WHITE

BLACK
meets WHITE

Kludi sets expressive colour highlights in the bathroom. Brand-new and ultra-trendy : extension to the successful KLUDI ZENTA range. Black: Elegant and timeless, standing for both individualism and exclusivity. White: Pure and radiating while convincing thanks to its simplicity.

KLUDI ZENTA BLACK & WHITE can be combined with any trend in the bathroom and kitchen. The eco s-pointer makes water savings easy while adjustment of the spray angle ensures even more individualism. The high-tech process associated with the PUR coating means that surfaces shine over the long term making it even more difficult for scratches and dents.

KLUDI NEW WAVES

Crisp purist lines

KLUDI NEW WAVES focusses on the essential: the geometric form. Two cylinders, at a dynamic angle to each other, characterise the purist design of the range.

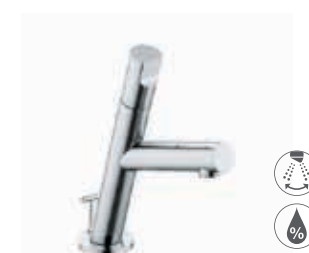

Reduction as a design principle

KLUDI NEW WAVES demonstrates purism with a dynamic feature. The handles are incorporated into the basic form – and are identical in shape in all mixers. The shower continues this use of crisp lines. KLUDI NEW WAVES sets a striking example of fine design.
