

Fratelli Mariani SPA is a leading European Manufacturer of Expanded Metals and Wire Mesh; MARIANitech Architectural Solutions is the new Fratelli Mariani's brand related to the Architectural applications.

MARIANitech products contribute, with innovative architectural solutions, in the cladding façade systems in old refurbished building and in new one as well, modifying the esthetical appearance of the constructions with projects which gives new "light" and new "skin" to the residential and industrial buildings.

MARIANitech products use fully recyclable raw materials and they becomes leader in new projects accordingly to the most updated environmental laws and they give an important contribute into the CO2 emission reductions being naturally a sun screening elements for the buildings , they also reduce the relative electrical consumptions.

MARIANitech Expanded Metals and Wire Mesh can be manufactured in any materials like for example aluminium, stainless steel, copper, brass, corten steel, galvanized steel, mild steel , and other various alloys.

On these products is possible to apply surface treatments with best technology available on the market like epoxy painting, natural and coloured anodizing, hot dip galvanizing; these surface treatments highlight the design and the durability on the life time of the products.
