SANIPEXPROJECT

“The project division has developed an enviable reputation as an accomplished and experienced bathroom supplier to the professional project sector. Our legacy of providing real value and expert service is illustrated in the broad list of project references across the hospitality, residential and institutional segments of the market. Working closely with stakeholders through every stage of a project, this success is no accident and is testament to genuine know-how coupled with teamwork and an ability to interpret clients’ requirements in such a way that delivers outstanding bathrooms on time and within budget. These accomplishments are underpinned by our proven supply chain and excellent logistics capability, reinforced through technical support and after-sales service.”

GUY WILSON

MANAGING DIRECTOR - TRADE & PROJECTS MEA

OUR STORY

Established in 1995 and active throughout the wider Middle East, SANIPEX GROUP started off as a commercial trading office for high quality European plumbing and bathroom products.

By the year 2000 the company opened its first BAGNODESIGN branded showroom in Dubai, offering contemporary bathroom products to architects, interior designers and developers.

Although being a member of the SANIPEX GROUP, BAGNODESIGN rapidly developed into an independent and well-known brand in its own right. The BAGNODESIGN brand became synonymous with offering high quality sanitaryware, as well as providing excellent customer service and after-sales technical support. This formed the basis that enabled the group to secure major projects with key local and regional developers such as Emaar (master developer of Dubai Marina) and Nakheel (Palm Jumeirah villas).

The year 2003 marked the start of the company's manufacturing capabilities in the UK, Italy and China to produce both luxury and value engineered products across the bathroom portfolio.

As a group, SANIPEX represents some of the world's leading manufacturers, most of whom are exclusive within the markets in which the company operates, in particular the Middle East, Central and South Asia and Africa. Having access to such a wide range of quality products allows the group to compete for any project, by being able to offer a solution irrespective of design aesthetics or budget.

The group's unrivalled supply chain capability gives customers what they want when they want it. With easy access to both sea and air freight facilities, stock can be efficiently mobilised and distributed to clients across the globe. With the latest warehouse management system, stock levels are optimised and the movement of thousands of products is tracked every week.

In addition to being a distributor of leading boutique brands of brassware and sanitaryware, the BAGNODESIGN brand part of the SANIPEX GROUP, has proven to provide comprehensive and integrated collections, which have been developed to meet designers' and retail requirements. Due to its success, the brand's products have been specified and installed in some of the world's finest hotels, iconic buildings, high-end residential and commercial developments.

Recognising a demand in the institutional sector for public washroom solutions, the AQUAZONE brand was created in 2008, offering a comprehensive collection of washroom products as well as concealed bathroom plumbing solutions.

Following on from its success across the Middle East and Central Asia, BAGNODESIGN opened its first showroom in Europe in 2013 in central London, along with a logistics centre to serve and support the growing UK and European business.

Since it was established in 1995, SANIPEX GROUP and BAGNODESIGN have been built upon trust and partnerships with its professional client base; be they designers, developers, retailers or project managers. Quality and service have always been kept at the heart of the company's value proposition, supported by inspiring, on-trend and interactive showrooms.
