Aluminium colors available:  
All color folder except Green RAL6009 matt.

## SCENICA

Just as you want me...

Thanks to completely revolutionary patented systems and production using the latest technology while at the same time retaining the traditional materials (Aluminium structures and fibre glass nets) Bettio has been able to create the perfect mosquito screen!!

SCENICA, is a lateral roller which consists of only a box and an upper track. There is no track on the apposite side and no track on the floor. The box, measuring only 50mm, is capable of enclosing 2 mt. of rolled up net which means that with two "SCENICA" a window or door space of 4 mt. wide can be covered.

A special handle bar allows you to block the screen in any position without rewinding it and keep it perfectly taut at all times.

Mechanically and aesthetically perfect and easy to operate, this new mosquito screen eliminates the problem of architectural barriers and can be adopted in places used by children, elderly and disabled.

### TECHNICAL info

#### SPACE NEEDED

SCENICA takes up only two sides of the door opening and needs only a space of 53mm on each one for its installation. If the cap (see adjustment) is used on the upper track, the space required is 56mm.

#### POSSIBLE DIMENSIONS

The maximum dimension obtainable with SCENICA is 2000x2800 mm per leaf: starting from a basic measurement of 2001mm you can arrive at double leaf which covers up to 4000x2800mm. Dimensions never seen before for a roll-up mosquito net.

#### WARNING:

**SINGLE DOOR VERSION:** the screen can be manufactured only if the height is equal or longer than the width +100mm.

**DOUBLE DOOR VERSION:** the screen can be manufactured only if the height is equal or longer than the width divided in two +100mm.

#### OPTIONAL

An "U" shaped profile can be requested on order.

#### ADJUSTMENTS

The cap, which can be applied to the upper track, can compensate for up to 8mm in cases where a wall is not completely straight.

The upper track can be regulated by up to 8mm vertically.

#### Adjustments

The upper track can be regulated for up to 8mm.

The cap can compensate for up to 8mm.

#### Parts Key

- |                    |                  |
|--------------------|------------------|
| 1 Adjuster profile | 5 Wire Cap       |
| 2 Adjusters        | 6 Lower Block    |
| 3 Cap              | 7 Chain elements |
| 4 Upper Track      | 8 Box support    |
