

SUPERFiX

The innovative fixing system for installations

Smart solution for fixing installations

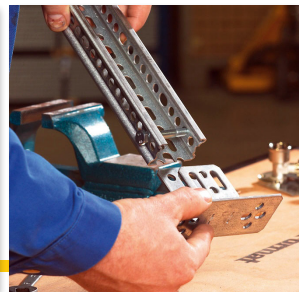

A complete set of rails, clamps, and accessories innovatively designed to make installation easier, faster and safer.

Keep it simple by making it flexible ...

The key to SuperFix simplicity is its flexibility, making it a unique solution for a variety of needs.

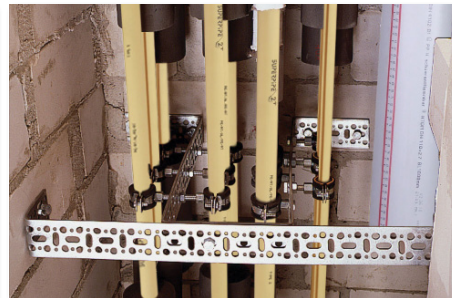

■ SuperFix Strap can be formed easily by using a simple bending tool - freehand or on a vice.

■ SuperFix U in a rail shape offers maximum rigidity.

Both may be used separately or combined according to your specific need.

With only two main components, a wide range of installations in complicated situations and for many applications is possible.

Pipe clamps and a variety of fittings can be installed easily on the hole matrix by standard threaded rod or screws.

With this flexibility and simplicity, you will be surprised that how you could manage your installations without it!
