

# Synthesis **Premium Hortshade**

The quality investment in asset  
protection

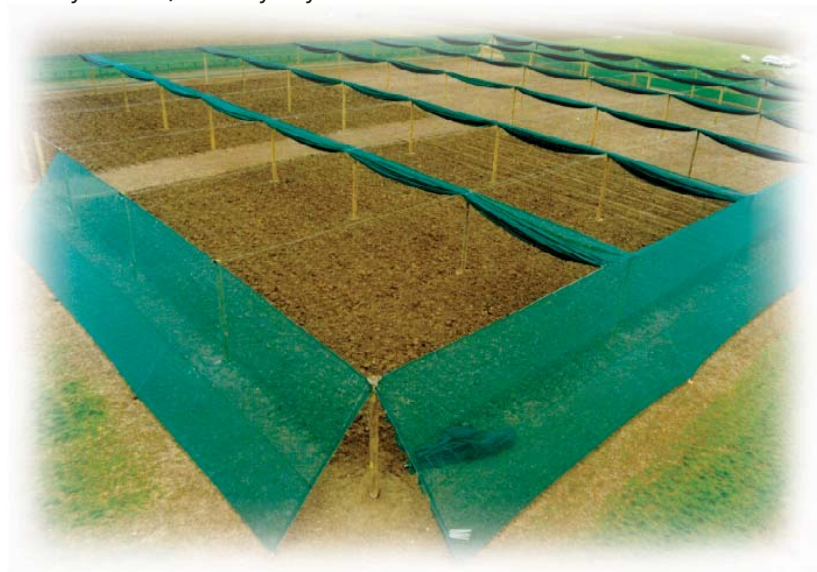

# Experience meets versatility

## Advanced knitted shadecloth to provide protection anytime, anywhere

Synthesis Premium Hortshade is designed to protect and nurture. A blend of two of the best horticultural fabrics available, Premium Plus and Hortshade, Premium Hortshade culminates from years of field experience in Australia and New Zealand.

Premium Hortshade is an extremely high-quality, knitted shadecloth offering sun block factors ranging from 80% cover down to just 26%. It's more than capable of providing optimum performance in any climate, virtually anywhere in the world.

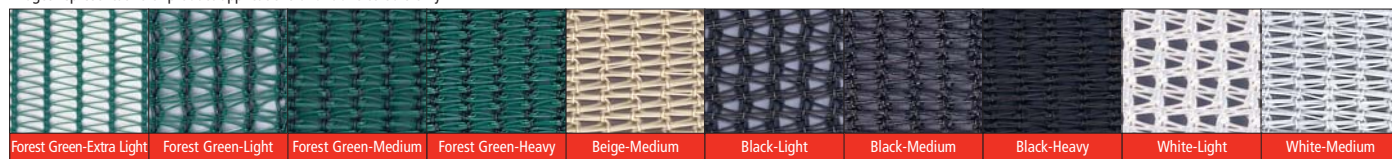

Made from UV-stabilised High Density Polyethylene, Premium Hortshade is designed to last. It resists sun damage, won't rot or absorb moisture and will not fray or tear if cut.

Premium Hortshade is designed for use in horticultural, agricultural and commercial applications to provide weather and pest protection, enhanced yield, improved crop aesthetic and an overall more efficient environment for growth.

Premium Hortshade is also used as shade protection for livestock, protection for vehicles and equipment in harsh weather extremes, and scaffold cover in construction works.
